📍 Egypt, Alexandria

SUMMARY

3rd-year B.Sc. Computer Science (Intelligent Systems) student at **Alexandria University** with strong interest in **Artificial Intelligence, Data Science, and Computer Vision**. Experienced in building real-world AI solutions using Machine Learning and Deep Learning, with hands-on projects in **Python, PyTorch, TensorFlow, OpenCV, and LangChain**. Skilled in **software engineering principles, backend development, and AI workflow automation**. Built systems including **multilingual translation tools**, real-time **object tracking**, and custom **computer vision libraries**. Seeking a Summer 2026 AI/Data Science internship to apply skills in **AI systems, computer vision, and intelligent automation**.

TECHNICAL SKILLS

Machine Learning | Reinforcement Learning | Deep Learning | Scikit-learn | PyTorch | TensorFlow | Computer Vision | OpenCV | RAG | YOLO | ResNet | Data Analysis | Seaborn | Pandas | Software Engineering | Agile Methodology | Natural Language Processing | Hugging Face | LangChain | Matplotlib | IoT & Embedded Systems | Git, GitHub | n8n | NumPy | Databases | SQL | AI Automation | Node.js | Django | Design Patterns | JavaScript | Networks | Cloud Computing | AWS

PROFESSIONAL EXPERIENCE

NVIDIA DLI Summer Training Program, Intern 02/2026 – 02/2026 | Remote
Hands-on training in **Large Language Models (LLMs)**, **prompt engineering**, **generative AI**, and **Retrieval-Augmented Generation (RAG)** systems. Built LLM applications using **LangChain**, including prompt templates, chains, and **workflow pipelines**. Gained experience in prompt optimization, evaluation techniques, and understanding real-world limitations of LLMs.

CodeAlpha Virtual Training Program, Artificial Intelligence Intern 03/2026 – 04/2026 | Remote
Developed a **multilingual translation web app** using **Python, LangChain, Node.js, APIs from OpenRouter** with dynamic model switching across **5 languages** and improved translation quality using prompt engineering. Built a **real-time object detection and tracking system** using **YOLOv8** and **OpenCV** with multi-object tracking and distance estimation (**10+ FPS**).

AIC Single Object Tracking Competition 03/2026 – 04/2026
Developed and evaluated **SiamFC, OSTRack, and YOLO-based object tracking models** as part of a competitive team project.
Ranked **21th place** in the competition through performance optimization and comparative model analysis.

eYouth Freelancing 101, Intern 11/2025 – 01/2026 | Remote
Completed training on **freelancing fundamentals**, including client communication, proposal writing, personal branding, and project management.

ACADEMIC PROJECTS

Deep Learning before transformers

- Developed and evaluated **RNN, Attention-RNN, LSTM, and GRU** models for text generation and language modeling on a **1.2M+ word corpus** using **PyTorch** and **TensorFlow**.
- Applied **text preprocessing, tokenization, word embeddings, regularization techniques (Dropout, Batch Normalization)**, and performance evaluation; achieved best results with **LSTM**.

Computer Vision Library (VisionPro)

- Developed a custom **OpenCV-based** computer vision library implementing image **enhancement, segmentation, panorama stitching, HDR imaging, depth estimation**, and **document restoration** pipelines

Data Science and Data Analysis

- Performed **data cleaning, EDA, feature selection**, and clustering analysis using **Genetic Algorithms, K-Means, K-Medoids, Hierarchical, and Fuzzy Clustering**.

DNA Pattern Recognition, Using PCA and LDA

- Developed a **DNA sequence classification system** using **PCA, LDA, Random Forest, and SVM** for feature extraction and predictive modeling.

EDUCATION

B.Sc. in Computer Science (Intelligent Systems Department)

2023 – 2027

Alexandria University, Alexandria, Egypt

Undergraduate, Senior

Current CGPA: 3.18 / 4.00
